

Computer Guided Surgeries

2 Days of Guided Surgeries

Lectures and 3D Workshops on models

Dallas, Texas :: February, 17 and 18 – 2012

San Diego, California :: April, 13 and 14 – 2012

Ontario, Canada :: June, 8 and 9 – 2012

West Palm Beach, Florida :: August 10 and 11 – 2012

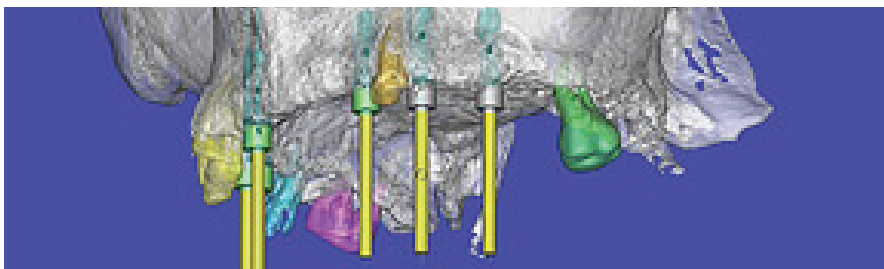

San Antonio, Texas :: October, 12 and 13 – 2012

EDUCATIONAL OBJECTIVES

The art and science of 3 Dimensional implant dentistry has taken giant steps in the field of computer based treatment planning. These advances allow the clinician to perform safer, more accurate and faster implant surgeries than ever before. The CAD/CAM technology enables us to perform surgeries using bone, teeth or mucosa supported surgical guides. The purpose of these courses is to teach dentists how to carry out a computer guided surgery from fabricating a scanning prosthesis to performing flapless surgery.

Day # 1

3D Building blocks: understanding the 3D world

- Accurate impression techniques for accurate scanning prosthesis
- Scanning protocols
- Converting ct-scan raw data into 3D working images
- Head and neck "virtual anatomy"
- Identify anatomical landmarks
- Recognized bone topography and density classifications
- Create and understand surgical safety zones
- Learn to place implants in 3D views.
- Designing and ordering CAD/CAM surgical guides
- Understanding computer guided surgical kits vs. conventional kits
- Guided drills and guided components
- Executing computer guided flapless surgeries

Day # 2

Hands-on workshops

1. 3 Dimensional software workshop: participants will convert Dicom files, outline anatomical landmarks and perform 3D virtual surgeries on a mandibular and a maxillary fully edentulous arch.
2. Surgical workshop: Doctors will place implants on models using computer guided kits

Course tuition: \$1,295

Dr. Virgil Mongalo

Director and developer of Live Implant Training courses taught in USA, Mexico, Central America and Brazil.

Awarded Degree in Dental Medicine from University of Florida in 1991. Advanced Implant Training in Computer Guided Protocols and Immediate loading surgeries from the Facial Aesthetic Institute in Philadelphia. Diplomate & Ambassador to the ICOI Private practice in Florida since 1991 exclusive to implant dentistry.

Past teaching appointments as instructor of computer guided surgeries and full arch immediate loading protocols includes: associate professor at the University of Florida, co-chairman of Robert Morgan Institute and Chairman of Implant department at Nicaragua Catholic University. Currently enrolled in a PhD program in education at Nova South East University.

SPONSORS

iMagDent :

iMagDent provides a full-range of Cone Beam CT digital imaging services to complement and streamline the modern dental implant practice. Our services include radiographic prosthesis fabrication, Virtual implant planning services featuring many treatment planning software options including Nobel Guide, surgical guide ordering assistance and Board Certified Radiology interpretations. iMagDent is your virtual treatment plan coordinator for all of your guided cases. iMagDent has eight imaging locations and provides web-based planning services for customers throughout the US and world.

Nobel Biocare:

Scientific leadership and innovation for 40 years. We are the world leader in innovative restorative and esthetic dental solutions, providing dental professionals with state-of-the-art evidence-based tooth-to-root solutions. Our mission is to be the most desirable partner in science-based solutions that help dental professionals to make a real and lasting difference to the well-being of their patients

Dr. Mongalo Implant Institute

is the leader in live surgical implant training courses, offering 7 day courses with "hands on live patients" in Puerto Vallarta, Mexico, and a 4 day course at Georgia Health Sciences University, Department Oral Maxillofacial Surgery.

Upcoming Courses 2012

7 Days Live Surgical Courses

- 1 Day of Lecture
- 6 Days of intensive surgeries on patients
- Each doctor will work on 6 patients
- Puerto Vallarta, Mexico

4 Days Live Surgical Courses

- 2 Days of Lectures
- 2 Days of Surgeries on patients
- Each doctor will work on 2 patients
- US & Canadian Doctors will be granted "Resident Status"
- Georgia Health Science University, Department of Oral Maxillofacial Surgery

2 Days of Live Bone Grafting Courses

- 2 Day of Lectures
- Mongalo Dental Institute - Miami, Florida
